

Fifth Swedish-Finnish Connective Tissue Meeting
September 24-25, 2009
Harjattula Conference Center, Turku, Åbo, Finland

Program Schedule

Thursday 24.9.2009

9:30 Welcome coffee and registration

10:25 Opening of the symposium

10:30-12:30 Session I Cells

Lars Rönnstrand: Methods to study protein phosphorylation

Selected short presentations

12:30-14:00 Lunch, exhibition

14:00-16:00 Session II Cells

Staffan Johansson: Integrins and cell signaling

Selected short presentations

Coffee, exhibition, posters

17:00-18:00 Session III Hot topics in the life science research methods

Matti Poutanen: Turku Center for Disease Modeling

Anne Roivainen: Applications of Small Animal Pet

Short selected presentation

18:00-18:45 Honorary Member Lecture

Leena Bruckner-Tuderman

19:00 Dinner, Sauna

Friday 25.9.2009

9:00-10:30 Session IV Extracellular matrix

Johanna Myllyharju: 4-Hydroxyprolines, from collagens to the regulation of oxygen homeostasis and beyond

Selected short presentations

10:30-11:30 Coffee, exhibition, posters

11:30 -13:30 Session V Extracellular matrix

Plenary, selected from the participants

Selected short presentations

Session VI Hot topics in the life science research methods

Pekka Hänninen: Stimulated Emission Depletion (STED) microscopy

Kirsi Rilla: Photoactivated GFP as a novel tool to study protein kinetics in live cells

Selected short presentations

16:00-16.15 Poster awards and Closing of the symposium

16:30 Business meeting
